Business Continuity Overview

Purpose

The purpose of this plan is to prepare our business in the event of extended service outages caused by factors beyond our control and to restore services to the widest extent possible in a minimum time frame.

Outcome

The outcome of this plan is to ensure that the business is able to maintain a good level of service for our customers

Plan objectives

- Serves as a guide for those implementing our business continuity plan
- Assists in avoiding confusion experienced during a crisis by documenting, testing and reviewing recovery procedures.
- References and points to the location of critical data.
- Provides procedures and resources needed to assist in recovery.

Key staff

If a disaster occurs the members of our team tasked with enacting this plan are:

• Mr Manav Arora (Managing Director)

Staff Welfare

In any emergency the health and happiness of your staff will always be your primary concern. This section serves as an important reminder that, while recovering from a disaster is important for the business, the welfare of our team always comes first.

It must be recognised that an incident that results in the enacting of this plan may also cause additional pressures for staff. Staff members are given clear direction about the priorities of the business. Managers will ensure that they monitor staff more closely to ensure that their welfare is maintained.

Staff is aware of what their role is when a major disruption occurs. Clear and concise communication with staff is pivotal to having an organised response. Staff is made aware of what communication methods are going to be used so they can find out the latest information, if they are going to be working from a different location than normal.

Managers who suspect that staff members have suffered undue stress or even trauma from the business disruption must consider providing assistance for those staff who have been affected.
